520 Lafayette Road
St. Paul, Minnesota 55155-4194

Dear Mr. Campbell:

Re: Proposed Sampling Locations
April 2009 Residential Well Sampling Event
North Oaks, Minnesota

On behalf of Whirlpool Corporation and Reynolds Metals Company, Conestoga-Rovers & Associates (CRA) submits the attached list (Table 1) of proposed sampling locations for the April 2009 residential well sampling event in North Oaks, Minnesota. The proposed sampling locations are also identified on the attached figure (Figure 1). The April 2009 residential well sampling event will be conducted in accordance with the long-term residential well monitoring program outlined in CRA's Feasibility Study Report, which was approved by the Minnesota Pollution Control Agency (MPCA) on November 7, 2007.

Please note: two locations (2 Hummingbird Hill and 13 West Shore Road) have been removed from the residential monitoring program. New (deeper) replacement wells were installed at these locations in March 2009, by Whirlpool and Reynolds. The new residential wells were sampled immediately following installation and will be sampled again in approximately 6 months (September 2009), in accordance with the sampling schedule outlined in Section 5.3.1 of the Feasibility Study Report (CRA, 2007). The former residential well at 2 Hummingbird Hill has been converted to a monitoring well and will be sampled annually as part of the routine monitoring well sampling program. The former residential well at 13 West Shore Road was sampled in March 2009 and is scheduled to be abandoned in April/May 2009.

CRA would like to conduct the April 2009 residential well sampling event during the week of April 20, 2009, and would again request MPCA's assistance in the coordination and collection of residential well samples.
