Mayor and Council Members-

Below is an update on key activities during the past month.

#### Replacement Extraction Well Near the Dump Site

CRA is preparing a report documenting construction of the new well and recommended operating rates. The report is due to the MPCA this month, and a copy will be provided to Wenck for review.

#### Replacement Well at 12 West Shore Road

It is my understanding that the variance request for the well location is on the agenda for the July Council meeting. Installation of the well is pending the outcome of the variance request and final agreement with the homeowner on the well location.

#### Groundwater Monitoring

The next scheduled round of well testing will be in October 2010.

Let me know if you have any questions, or if there is something else you would like me to do. Otherwise, I will report back before the August Council meeting.
